Allies Computing

Acceptable Use Policy (AUP) for PostCoder Web

1.1 Use of the Allies Computing web API (also known as PostCoder Web) and its data (collectively, the Service) is subject to this Acceptable Use Policy.

1.2 This Agreement is between Allies Computing and the entity that has elected to use PostCoder Web (the Customer).

1.3 Except as otherwise agreed by Allies Computing in writing, the Customer agrees to use the Service:

1.3.1 for a legal purpose which is compliant with all applicable laws and regulations;

1.3.2 to serve requests which are initiated by people in real-time (e.g. through a website form) and not an automated process (e.g. batch script working through a database or through the use of automated load generation / test tools);

1.3.3 for its own use and not within a solution which is offered or resold to third party organisations;

1.3.4 in accordance with the use that has been agreed in writing with Allies Computing; usage outside of this accord may result in additional charges which the Customer will pay upon request from Allies Computing.

1.4 Failure to comply with this Acceptable Use Policy will constitute a breach of the Terms of Use and may result in the Customer's access to the Service being suspended or terminated, and additional charges for our reasonable costs of investigating and dealing with the breach.

Without limitation, the Customer authorises Allies Computing to use their account data in connection with any such investigation, including disclosing it to any third party whom we consider has a legitimate interest in any such investigation or its outcome.
